

Claw Hammer

RH-4751

- Drop-forged polished steel head for maximum strength and durability for a lifetime of hard work
- Non-slip rubber grip handle provides a firm, non-slip grip which allows superior driving and impact absorption
- Shock absorbing fiberglass core handle
- Head-to-handle joint design is a non-detachable epoxy resin that remains resilient to wearing
- Handle coated with polypropylene grip for additional comfort
- Optimal weight distribution for better performance
- The curved claw design makes this tool perfect for construction, minor maintenances, building, woodworking, home repair, extracting or removing nails, hanging household items & etc.
